

LET'S MAKE A WATERMELON SLICE

Supplies Needed For Paper Plate Watermelon

- Paper plate
- White, Red, and Green Paint
- Small black beans or black pom poms
- Craft glue
- Brushes
- Scissors
- Craft sticks
- Ruler
- Pencil

How To Make A Watermelon Slice Craft

1. Paint the green and red parts of the watermelon - It doesn't really matter what color you paint first! Be as creative and artistic as you like! You can even add white to the red to give it depth with the color pink. Let it dry.
2. Once dry, mark the halfway point with your ruler and draw a line across as a guide to cut it in half.
3. Cut your paper plate in half.
4. Use the black beans or pom poms and a bottle of craft glue to glue on as the watermelon seeds. If you don't have black beans you can also use black paint with a Q-tip. Or if you have left-over watermelon seeds - save them. There is nothing better than using the real thing!
5. Once everything is dry, glue or tape the popsicle stick to the back!
