

RESIDENT DAILY DELIGHT

Clean Comedy Day

A true comedian can turn a completely innocent line into something hilarious, profanity and bawdy jokes aren't the only valid form of comedy.

While it's true that comedy is often built on the back of crossing societal norms and humorously presenting these situations, it isn't always necessary to spout profanity as part of a comedy routine. Some of the best comedy in the world is based on absurdity, and the absurd need not be bawdy. Clean Comedy Day celebrates this more family-friendly form of comedy by challenging us to keep our humor clean for a day and enjoy it all the same.

HOW TO CELEBRATE CLEAN COMEDY DAY

The best way to celebrate Clean Comedy Day is to find a performance and support those who have taken up the challenge of clean comedy. If you're truly daring, you can try getting up in front of others and belting out a joke or three yourself, even more, respectable if you can manage to come up with your material and delivering it to the crowd's delight. No matter what you do on Clean Comedy Day, try to keep your humor clean and try to encourage your friends and workmates to tell you their best clean joke.

ON THIS DAY...

The Musical "Hair" opened at the Baltimore Theater.

DID YOU KNOW???

Someone you probably know...

Jerry Seinfeld is from Brooklyn, NY, and attended Oswego College in upstate New York and transferred to Queens College. He developed an interest in stand-up comedy after brief stints in college productions. After several years of performing in local clubs, he partnered with Larry David and made the long-running series "Seinfeld". Most of his comedy is based on real-life experiences derived from awkward or unusual social situations

Sudoku

HOW TO PLAY SUDOKU

OBJECTIVE: Fill a 9x9 grid so that each column, each row, and each of the nine 3x3 boxes (also called blocks or regions) contains the digits from 1 to 9.

A cell is the smallest block in the game. Rows, columns, and regions each consist of 9 cells, and the whole game consists of 81 cells. A region has thicker lines surrounding it.

The most basic strategy to find missing numbers is scanning and it consists of:

1) Crosshatching - Scan rows and columns to eliminate where a specific number can be in a given region.

2) Counting - Simply count all the different numbers in a row, column, and region that connect to one cell. If there is just one number missing, then that's what should be in the cell.

	6					1	2	5
			8	2	3	7		
	7	9		5				4
6	5						1	3
		3			9		4	
	4		6		2	8	5	
1				8		2		
5			7			4	3	
8	3		2	6				

					5		2	
3	9	8						4
	7			9	4	8		
			9	1				5
			4				6	8
6	3	5						
2		6					4	
				4	7			
9				8		3	5	

HINTS:

Until you've had lots of practice figuring out puzzles, here are some questions that you can ask as you play to help you to make progress:

- Where could I place the value X in this row/column/box? (Go through the numbers 1 to 9, and scan to see if the number is already in that row / column / box)
- What value could I put in this cell? (If there's just one acceptable – put it in!)
- What row / column / box is nearly full, and can I fill it?
