## Look For Circles Day

Today is a fun day because it's Look for Circles Day! Circles are everywhere, but you probably don't even realize just how many circles are right in front of you right now. If you're wondering who came up with this weird holiday, you'll find yourself running in circles because it is not known. This holiday was created in 2010 to celebrate the power of circles, which are found in nature, art, architecture, and more. Circles are a very unique shape considering that they have no beginning and no end, making them a perfect symbol for unity, infinity, perfection, and wholeness.

Take a look around today and see how many circles you can find, and perhaps have a contest with friends to see who can find the most. But don't make yourself dizzy going in circles.
