## Titanic Remembrance Day

National Titanic Remembrance Day is dedicated to the memory of the lives lost when the Titanic sank into the icy waters of the North Atlantic Ocean in April 1912. We remember the more than 1,500 people who died that day.

Known as the “the unsinkable ship,” the Titanic hit an iceberg at 11:40 pm on April 14, 1912, on her maiden voyage from England to New York City. Later, in the icy waters of the Atlantic Ocean, on April 15, the Titanic sank. Those who perished did so mainly due to an insufficient number of lifeboats onboard the ship.

There have been a few movies made about this subject, too, most recently **Titanic** starring Leonardo DiCaprio and Kate Winslet.

## HOW TO PLAY SUDOKU

**OBJECTIVE:** Fill a 9x9 grid so that each column, each row, and each of the nine 3x3 boxes (also called blocks or regions) contains the digits from 1 to 9.

A cell is the smallest block in the game. Rows, columns, and regions each consist of 9 cells, and the whole game consists of 81 cells. A region has thicker lines surrounding it.

The most basic strategy to find missing numbers is scanning and it consists of:

1) Crosshatching - Scan rows and columns to eliminate where a specific number can be in a given region.

2) Counting - Simply count all the different numbers in a row, column, and region that connect to one cell. If there is just one number missing, then that's what should be in the cell.

			2	6	9		4	
8	4		5			3		
	7		3			5	1	2
				2			9	4
2		3			6		7	8
		1		9	8		3	
5	8					7		6
	1	9						
			6	4	5			1

	5		1				3	2
	4						5	
	1		8	3				
6		2				4		
		4		6	2	8		
			3	8			6	
3				9	6			7
			2					1
7		8				6		4

## HINTS:

Until you've had lots of practice figuring out puzzles, here are some questions that you can ask as you play to help you to make progress:

- Where could I place the value X in this row/column/box? (Go through the numbers 1 to 9, and scan to see if the number is already in that row / column / box)
- What value could I put in this cell? (If there's just one acceptable – put it in!)
- What row / column / box is nearly full, and can I fill it?
