

RESIDENT DAILY DELIGHT

National Look-Alike Day

April 20th celebrates those who look like another person. National Look Alike Day each year April 20th celebrates those who much like look like another person. Similar to the two sentences preceding this one, people who look like each are still unique in their own way.

This day was created as a fun day to look like another person. Growing up, did a teacher constantly call you by another student's name? Some of us often hear the words, "You remind me of someone," or "You look just like so and so." If so, then you are one step ahead of the game.

Professional look-alikes perform as entertainers. Some of the most famous roles they play are Elvis Presley and Marilyn Monroe. But others look like presidents or actors.

If you do find your spitting image, some might call it a doppelganger. In folklore, seeing your doppelganger signals a bad omen. Though over the years, the term has come to mean someone who looks just

like you.

Now the chances of finding someone your mirror image depends on who you believe. There's no strong scientific evidence one way or the other, and different tools analyze what different features. But if you've met your living clone, you know just how likely the chances are of running into your look alike.

ON THIS DAY...

April 20, 1971

Barbra Streisand records "We've Only Just Begun".

DID YOU KNOW???

It must be jelly cause jam...

Who can tell? They look so much alike. Jelly is made by crushing fruit and removing all of the bits and pieces, leaving a spread with a smooth consistency. Jam crushes the fruit too, but leaves the small fruit pieces and fibers in the mix. I'll take mine either way.

Sudoku

HOW TO PLAY SUDOKU

OBJECTIVE: Fill a 9x9 grid so that each column, each row, and each of the nine 3x3 boxes (also called blocks or regions) contains the digits from 1 to 9.

A cell is the smallest block in the game. Rows, columns, and regions each consist of 9 cells, and the whole game consists of 81 cells. A region has thicker lines surrounding it.

The most basic strategy to find missing numbers is scanning and it consists of:

1) Crosshatching - Scan rows and columns to eliminate where a specific number can be in a given region.

2) Counting - Simply count all the different numbers in a row, column, and region that connect to one cell. If there is just one number missing, then that's what should be in the cell.

			1	5	9			
7	6					3		
	9			3		1	2	8
			9	2		6		4
	2	8				9	3	
6	3		4					5
		5		1	4	8	9	
8	1				5			
9				6	8		1	3

5	7			2				
			7	4	8			5
1				5		4		3
	5		8				1	
6	1		5			8	9	
		9						
					3	6	5	7
7	8		6			2		
					2	3	8	

HINTS:

Until you've had lots of practice figuring out puzzles, here are some questions that you can ask as you play to help you to make progress:

- Where could I place the value X in this row/column/box? (Go through the numbers 1 to 9, and scan to see if the number is already in that row / column / box)
- What value could I put in this cell? (If there's just one acceptable – put it in!)
- What row / column / box is nearly full, and can I fill it?
