

Make your Own

WHITE RABBIT POCKET WATCH

MATERIALS NEEDED:

- Scissors
- Craft knife if available (for inner cutting)
- Craft cutting mat or cardboard (if you are using a craft knife)
- Glue
- Watch Parts Template (on next page)
- Markers, colored pencils, watercolors, or crayons
- Tape
- Hole Punch
- One round metal paper fastener/brad

HOW TO MAKE THE WATCH:

STEP 1: Print out and color template.

STEP 2: Cut out the clock back and clock face. Use craft knife to cut inside of the watch crown.

STEP 3: Place tape over both sides of the clock hands and then cut them out. This will make them more durable so that they do not break when you move them.

STEP 4: Glue the clock face over the circle on the front of the pocket watch.

STEP 5: Take a hole punch and make holes through the circular bottoms of the clock hands.

STEP 6: Thread the round metal paper fastener through the holes you just made in the clock hands, and press the end through the center dot on the clock face. Flip clock over and spread ends of metal fastener to secure it in place.

Now you can adjust the hands to any time you want!
