National Feed The Birds Day

As the long, cold winter drags on, why not help the birds by throwing them a few seeds on Feed the Birds Day? Feed the Birds Day first occurred in 1994 as a way to get people to feed birds during the coldest part of the winter where snow is plentiful and food for them is scarce. Due to snow covering what little food they have available, placing a bird feeder outside or just going out and spreading some seed by hand can go a long way to helping the birds get some much needed nourishment while you get some much needed winter entertainment.

Nutrient-rich seeds include black-oil sunflower, nyjer (or thistle seed), white proso millet and sunflower chips, but avoid using red milo seed (sorghum), as birds won't eat it.
