National Rescue Dog Day

Celebrate the amazing bond between humans and their canine friends on National Rescue Dog Day, May 20th! This special day was created to recognize the incredible impact rescue dogs have in our lives. Rescuing a dog brings with it so much joy and love, plus it helps reduce overcrowding in shelters and rescues.

Whether it's an older pup or a puppy who needs a second chance, rescues allow these animals to live in safety and comfort. Not only do they provide people with unconditional love and companionship, but rescue dogs also help bring about healing for those who have experienced trauma or loss. Rescue dogs also show us that all life is valuable no matter what their past has been like.

Today in History

In 1973, Mary Tyler Moore was among the winners at the 25th Emmy Awards, one of 7 she won throughout her career. Moore's breakthrough role was in the "Dick Van Dyke Show," where she played Laura Petrie. Her most iconic role was Mary Richards in "The Mary Tyler Moore Show".

DID YOU KNOW?

Monopoly Properties

Monopoly's properties are named after locations in Atlantic City, New Jersey, due to a regional version created by Ruth Hoskins. After learning an earlier version of the game in Indianapolis, she adapted it with friends in Atlantic City. One of these friends, Charles Todd, introduced this version to Charles Darrow. The placement of properties on the game board reflected Atlantic City's actual property values at the time, making the game locally relevant.

How To Play:

Each 9x9 box is comprised of 9 smaller 3x3 boxes. Each of these smaller boxes must be filled in with numbers from 1-9. Each row and column of the larger 9x9 box should not have any numbers repeated.

9					2	4		7
	5	2	7					1
			6	3	8			
3		5		8			9	2
7	2			9		3	8	
8			2	5	3			
	8	1			4	9	7	
	7		8		1	2		
			9				4	

9		5		4				
		1	6	7		3		
				9		6	1	
7					9			
2		6			4			5
	1							2
	2					7	3	8
8			2	6				
		7	4	3		2		

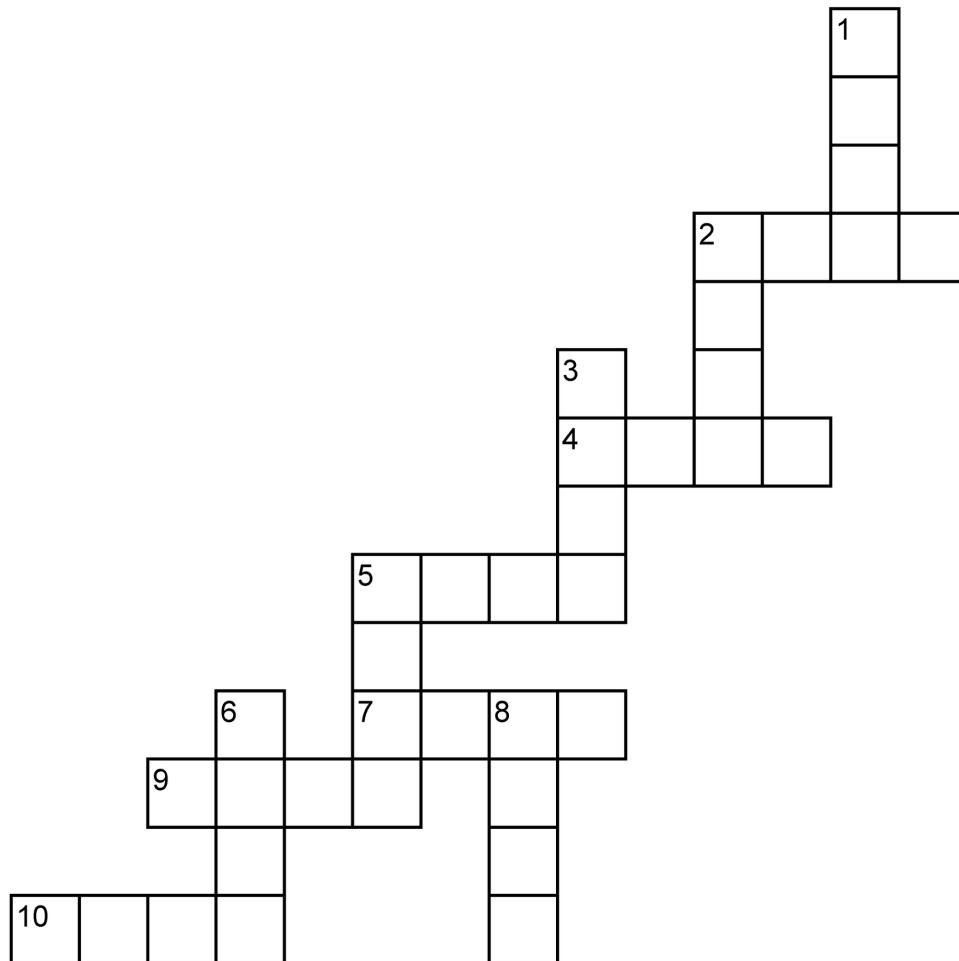

Helpful Tip:

If you get stuck, try asking yourself "Where can I place number X in this row or column?" Scan to see if the number is already in that row, column, or box.
