National Sewing Machine Day

If you have ever sewn clothes by hand, you know what a painstaking process it is. Stitch by stitch, it takes a steady hand and an enormous amount of patience to complete a garment. With the introduction of the sewing machine, the production of clothes and other articles became easier for tailors and seamstresses. Today's the day we celebrate this great invention by declaring June 13th as National Sewing Machine Day! Sewing machines have been around since the 1800s, however, Isaac Singer's updated version is still considered the gold standard in sewing machines. The parts of the machine have stayed relatively consistent over the years, including the needle, foot pedal, bobbin winder, hand wheel, and most importantly, a motor! Do you have a favorite pattern or article that you have sewn?

DID YOU KNOW? Devils Tower History

Devil's Tower is a striking rock formation that rises 867 feet in northwestern Wyoming, revered by Indigenous cultures. Initially called "Bear Lodge" by settlers, its name changed when Colonel Richard Irving Dodge misinterpreted the Lakota name Mato Tipila as "bad god's tower." This led to the name Devil Tower, although there's no evidence that Native Americans viewed it as linked to evil spirits.
