National I Love Horses Day

Don't hold your horses; it's National I Love Horses Day! From transportation and agriculture to entertainment and even therapeutic instances, horses are one of the world's most versatile and intelligent animals. Horses as we know them today have been around for over 50 million years, and are believed to have originated in North America with traveling and globalization taking horses to faraway places like Ukraine and Kazakhstan. Even though they were domesticated by nomads around 4000 BCE, wild horses continue to exist around the globe. Throughout their history, they have proven to be extremely socially adept, often seen roaming with members of their own species as well as other animals. And if you didn't know, a hippophile is a person who loves horses. Now quit horsing around, you hippophiles!

Today in History

In 1912, American athlete Jim Thorpe placed in the top 4 in all 10 events in the Stockholm Olympics, setting an Olympic record of 8,413 points. He won gold medals in the Pentathlon and Decathlon. He went on to play professional baseball, as well as football and basketball.

DID YOU KNOW?

Body Language Impact

Body language plays a crucial role in shaping voters' perceptions of presidential candidates, especially in debates. A notable example is the 1960 televised debate between Richard Nixon and John F. Kennedy. Nixon's anxious demeanor, sweating and fidgeting, contrasted sharply with Kennedy's calm and confident presence. This debate marked a pivotal moment, highlighting how body language can significantly influence a candidate's public image and electoral success.

How To Play:

Each 9x9 box is comprised of 9 smaller 3x3 boxes. Each of these smaller boxes must be filled in with numbers from 1-9. Each row and column of the larger 9x9 box should not have any numbers repeated.

		4		8	2	7	1	
1	9		6					5
3			1	5			2	6
6		3	4	9	8		7	1
	1	9	7	6				4
		8		2				
9	2	6		4	7		3	8
8	3	5	2			4	9	
	7	1		3		5		2

			4		5		3	9
					3	1		2
9		2	6	1		7		
2		6	5			9		3
7	9	3	2					1
8	5			3				7
	8			5	9	2	7	4
3	2		8		4	5	1	6
	7	5		6				

Helpful Tip:

If you get stuck, try asking yourself "Where can I place number X in this row or column?" Scan to see if the number is already in that row, column, or box.
