World UFO Day

We've all heard the rumors about what happened in Roswell, New Mexico. In 1947, farmers heard a crash, and later, the wreckage of a flying saucer was discovered. The truth? We're still not sure, and nothing has been conclusively proven. Still, some believe a UFO crashed there and that the truth has been covered up for all these years. What's interesting is that Roswell isn't even the first place to have records of strange sightings. There is historical evidence that states odd celestial sightings and phenomena back in 1561 over Nuremberg!

Since it's World UFO Day, we have to ask you: Do you think extraterrestrial beings exist? And do you think they've visited Planet Earth?

Today in History

In 1843, the National Weather Service Charleston office said there were reports of an alligator falling from the sky during a thunderstorm in downtown Charleston, South Carolina. A search for evidence of the incident turned up in an old clipping from a newspaper in New Orleans.
