National Aviation Day

National Aviation Day, celebrated on August 19, honors the Wright brothers, Orville and Wilbur, along with other aviation pioneers. Orville Wright was the first person to successfully fly an airplane, achieving this feat on December 17, 1903, in Kitty Hawk, North Carolina. This historic flight marked a pivotal moment in aviation history.

The date of August 19 was chosen in recognition of Orville Wright's birthday in 1871. National Aviation Day also pays tribute to other early aviation and space explorers.

It's a wonderful opportunity to gather with friends and family to reminisce about your first flight, memorable journeys through the air, or even witnessing rocket launches. If you've had the thrill of piloting an aircraft, share your experiences with others. Let your imagination take flight!

Carnac Stones

The Carnac Stones, located in Brittany, France, comprise over 3,000 ancient standing stones dating back to the Neolithic period, around 3300 to 4500 BCE. As one of the largest collections of menhirs in the world, their true purpose remains a mystery. Some suggest they served as calendars or observatories, while local legend claims they are petrified Roman soldiers transformed by Merlin, the legendary wizard, under the orders of Pope Cornelius.
