Roof Over Your Head Day

This is a day to stop and appreciate what we have, starting with one of the most important things: a roof over our heads. There are as many as 100 million people without shelter around the world, and this may be the reason this day was created.

Many states have developed creative solutions to address this issue and continue to implement strategies to provide shelter for everyone in America. It's important to remember that not everyone is as fortunate, so take time to be thankful not only for having a place to live but for all the blessings in your life.

"If you feed your mind as often as you feed your stomach, then you'll never have to worry about feeding your stomach or a roof over your head or clothes on your back."

Albert Einstein

DID YOU KNOW?

Breathe ID

Did you know that your breath may be as unique as your fingerprint? Scientists have discovered that each person's exhaled breath contains a distinct chemical signature. This "breathprint" is composed of a specific combination of hundreds of volatile organic compounds (VOCs). Your unique metabolic rate, diet, and even the microbes living in your body all contribute to this personal profile, which researchers are now exploring for its potential in diagnosing diseases and personalizing medical treatments.
