## National One Cent Day

April 1st is the day the United States government issued the first penny! This first one-cent coin had a picture of Lady Liberty with flowing hair. On the other side, the word "ONE CENT" appeared within a chain, which was interlocked with fifteen links. This coin was referred to as the "Flowing Hair Cent." The government produced more than 36,000 of these pennies and circulated them on April 1, 1793. Although this "Flowing Hair" cent coin was supposed to represent Liberty, the sight of the interlinked chain on the other side of the penny reminded some of the oppression by England and angered many. A wreath was used in place of the chain. Now the first U.S. penny is worth a whole lot more than one cent! One of these original pennies sold for almost \$1.2 million in 2015 at an auction in Baltimore.

## Today in History

In 1990, the "Ha!" comedy Channel on cable TV began transmitting. Viacom, which owned MTV, VH1, and Nickelodeon, launched a channel featuring reruns of situation comedies and some original sketch comedy, which aired from New York.

## **DID YOU KNOW?** **That's a lot of White**

The White House requires a new coat of paint every four to six years. Sometimes, it may be repainted in preparation for major events, such as an inauguration sooner. Still, it must be done with a special German-made paint in a specific shade called Whisper White at a cost of about \$150 per gallon. It takes roughly 570 gallons to repair the entire House.

## How To Play:

Each 9x9 box is comprised of 9 smaller 3x3 boxes. Each of these smaller boxes must be filled in with numbers from 1-9. Each row and column of the larger 9x9 box should not have any numbers repeated.

4		5	6	8	2			1
9				1	5			
8			9			6	3	
	4	2	1			8	5	
						2		3
		3	7				4	
3		8				7	2	4
			8	7				9
7					4	5		8

		9				4		7
5	4	1	2				9	8
	6			9	4			
	3						2	6
	7			6	9		8	
9	1					7		3
	9	2			3		6	1
1	5	3	9	2		8	7	4
6		7		4	5	2	3	9

## Helpful Tip:

If you get stuck, try asking yourself "Where can I place number X in this row or column?" Scan to see if the number is already in that row, column, or box.
