Saxophone Day

Strike up the band because today is Saxophone Day! Invented in 1840 by Adolphe Sax, the saxophone is a classical brass instrument that is essential in jazz bands, symphonic bands, marching bands, and more. Adolphe Sax invented eight types of saxophones, including sopranino, alto, tenor, baritone, bass, contrabass, and subcontrabass, with the ninth and smallest type, the soprillo saxophone, invented in 2004. While there have been some amazing saxophone players throughout the ages, perhaps the most well-known saxophone player of all time is the cartoon character Lisa Simpson. Listen to some John Coltrane, Stan Getz, Coleman Randolph Hawkins ("Hawk"), James Moody, Charlie "The Bird" Parker, Lester "Prez" Young, or even Lisa Simpson today to celebrate the greatness of the saxophone!

DID YOU KNOW? Do You Remember Your Dreams?

The average person dreams between four and six times per night, spending up to two hours dreaming in total. However, it's difficult to know exactly how long a dream lasts because not all dreams occur during REM sleep, and people often forget their dreams after waking up. Dreams tend to last longer as the night progresses, and each dream may last between 5 to 20 minutes.

Trivia Answer: B

The Statue of Liberty was originally conceived as a colossal statue of a robed Egyptian peasant woman holding a torch, intended for the Suez Canal. However, the project by sculptor Frédéric-Auguste Bartholdi was rejected because of its high cost.
