National Author's Day

Who's your favorite author?

Celebrated on November 1st since 1949, National Authors' Day is a time to celebrate and recognize not only your favorite author(s) of all time but also all the great authors throughout American history. So much goes into writing a book, let alone an all-time classic that people have loved to read for years. Have you ever wanted to be an author with dreams of writing your own book? Why not pick up a pen and a notebook and get started today? If you know an author, do something nice for them, or simply read a book to celebrate the day.

The holiday was first proposed in 1928 after Nellie Verne Burt McPherson, an avid reader and teacher, submitted the idea to the General Federation of Women's Clubs. The club endorsed the idea, and by 1949, the United States Department of Commerce recognized it as an unofficial national holiday.

Today in History

In 1800, John Adams became the first U.S. President to live in the White House. After serving 2 terms as Vice President to George Washington, he was elected as the 2nd President of the United States in 1796. Before his presidency, Adams was the leader of the American Revolution.

DID YOU KNOW?

Dragonflies Can't Walk

Dragonflies have six legs, but they are rarely used for walking. Instead, dragonflies use their legs for other purposes, such as catching prey, perching, and landing. They have large transparent wings and are considered among the best fliers in the world; those large wings also have antibacterial properties. Their eyes have 30,000 lenses that can detect ultraviolet light. Dragonflies are amazing creatures.

TRIVIA

How many legs do lobsters have, including their pincers?

A 10

B 8

C 12

D 6

TODAY'S FUNNY

Why don't ants get sick?

Because they have little antybodies.

TODAY'S WISDOM

*"Courage is being scared to death, but saddling up anyway."
- John Wayne*

How To Play:

Each 9x9 box is comprised of 9 smaller 3x3 boxes. Each of these smaller boxes must be filled in with numbers from 1-9. Each row and column of the larger 9x9 box should not have any numbers repeated.

		8		4	1	6		9
9	2		7	5				8
	3				2			
	5						1	
1				7	3	2		
4		2	1	8			3	
	6	3						1
	4				7	5		
							6	

	4			9		6		3
8	3	7	2		1		4	
1		6	3	5	4		7	2
5	8		4	1		2		
4		2		7	6		3	8
7	6	3	5	8				1
9		4	1			3		6
	5	8	7	3				4
	2	1		4	5		8	9

Helpful Tip:

If you get stuck, try asking yourself "Where can I place number X in this row or column?" Scan to see if the number is already in that row, column, or box.

SOLUTIONS

Trivia Answer: A

Lobsters are decapod crustaceans, meaning they have ten legs. These include their large, powerful front claws, which are a modified pair of legs used for defense and hunting.
